Built for the Cloud + AI Era

VM Cloud AI Technologies LLC is conceived as a specialist cloud, artificial intelligence, cybersecurity and managed services company serving UACD organizations that want measurable business outcomes from modern technology.

Our Proposition

We bring cloud platforms, AI adoption, Security and ongoing operations together under one accountable technology relationship - from assessment and licensing through migration, protection, management and optimization.

Cloud First

Design, migrate and operate secure workloads across Microsoft Azure, AWS, Google Cloud and hybrid environments.

AI With Purpose

Turn Copilot, agents, automation, analytics and generative AI into practical workflows and measurable productivity.

Secure By Design

Embed identity, endpoint, data, cloud and operational security into every transformation program.

Managed Continuity

Provide monitoring, administration, backup, recovery, optimization and service support across the lifecycle.

Business-Led Delivery

Start with business objectives, risk, users and economics — not technology for technology's sake.

UAE Focus

Build solutions for the governance, data residency, service responsiveness and commercial realities of UAE customers.

Vision, Mission & Values

VISION

To become a trusted UAE technology partner for organizations adopting cloud and artificial intelligence securely, responsibly and at scale.

MISSION

To simplify digital transformation by combining cloud platforms, AI solutions, cybersecurity and managed services into clear, outcome-driven solutions with strong local support.

OUR VALUES

PRINCIPLES THAT
DRIVE A BRIGHTER TOMORROW

UAE INNOVATION
FOR A BRIGHTER
TOMORROW

Trust

Protect customer data, access and operational continuity.

Clarity

Make cloud and AI commercially understandable and technically actionable.

Ownership

Stay accountable from design through operations.

Security

Treat security as architecture, not an add-on.

Innovation

Adopt emerging technology where it creates genuine value.

Service

Build long-term relationships through responsive support.

BRIGHTER
TOMORROWS

One Technology Partner. One Transformation Journey.

The strongest customer relationships are built across the lifecycle—not around a single license, migration or project.

CLOUD
PEOPLE
POSSIBILITIES

What customers gain

- One accountable partner across cloud, AI, security, licensing and managed operations.
- Reduced complexity through standardized architecture, governance and support.
- Better cost control through right-sizing, licensing optimization and FinOps practices.

- Faster adoption of Microsoft 365, Azure, AI and modern workplace capabilities.
- A structured path from experimentation to secure enterprise AI deployment.

Six Core Technology Practices

Integrated capabilities to help you innovate, secure and transform for a smarter future.

CONNECTING
PEOPLE
TECHNOLOGY
POSSIBILITIES

01

Cloud Solutions

Public, private and hybrid cloud; landing zones; infrastructure modernization; migration; networking; compute; storage; governance.

02

Microsoft Cloud

Microsoft 365, Azure, Teams, SharePoint, Exchange Online, Entra ID, Intune, Defender, Power Platform and Copilot.

03

AI & Automation

AI agents, Copilot adoption, generative AI, RAG, chatbots, document intelligence, workflow automation and analytics.

04

Cybersecurity

Identity, endpoint, email, cloud, data and network security; Zero Trust; SIEM/SOC; assessment and compliance support.

05

Managed Services

Monitoring, administration, service desk, backup, DR, patching, incident support, optimization and reporting.

06

Digital Transformation

Advisory, readiness assessment, migration strategy, modern workplace, application modernization, DevOps and integration.

Artificial Intelligence & Automation

AI should move beyond demonstrations. Our approach is to connect trusted enterprise data, governed access and practical workflows to measurable business outcomes.

IDEAS
AUTOMATION
INTELLIGENCE
REAL RESULTS

Copilot Adoption

Readiness, data/security preparation, use-case discovery, rollout, adoption and governance.

RAG & Knowledge Assistants

Ground AI responses in approved enterprise documents, policies, databases and knowledge sources.

Document Intelligence

Extract, classify, validate and route information from invoices, forms, contracts and operational documents.

Analytics & BI

Dashboards, forecasting, anomaly detection and decision-support experiences.

Enterprise AI Agents

Role-specific agents for service, operations, sales, finance, HR and knowledge workflows.

AI Chatbots

Customer and employee assistants integrated with websites, portals, collaboration tools and service workflows.

Workflow Automation

Combine AI with Power Platform, APIs and business systems to reduce manual work.

Custom AI Integration

Connect models and AI services to existing applications, data platforms and operational systems.

Cybersecurity

Cloud transformation and AI adoption increase the importance of identity, data protection, visibility and governance.

Identity Security

MFA, Conditional Access, privileged access, identity governance and Zero Trust controls.

Endpoint Security

Device compliance, EDR, hardening, patching and managed endpoint protection.

Email & Collaboration

Anti-phishing, secure email, data protection and collaboration security.

Cloud Security

Posture assessment, configuration hardening, logging, workload protection and policy governance.

SIEM / SOC

Centralized monitoring, alerting, incident workflows and managed security operations.

Vulnerability & Risk

Assessment, remediation planning, baseline reviews and compliance-aligned improvement.

Security principle

Every cloud or AI engagement should define identity, data classification, access, logging, backup, recovery and governance requirements before production rollout.

MAXIMIZE UPTIME

Our Continuity Lifecycle

ASSESS | IMPLEMENT | VALIDATE | IMPROVE

01

Discover

Identify critical workloads, dependencies and recovery objectives (RPO/RTO).

02

Protect

Implement backup, replication, retention and security controls.

03

Recover

Document recovery procedures and validate restoration paths.

04

Improve

Review results, close gaps and update continuity plans.

Key Benefits

- ✓ Cloud and Microsoft 365 backup strategy
- ✓ Server, virtual machine, application and data protection
- ✓ Recovery objectives (RPO/RTO) aligned to business criticality
- ✓ Off-site / cloud replication and immutable backup options
- ✓ Disaster recovery runbooks and recovery orchestration
- ✓ Periodic restore testing and DR simulation
- ✓ Business continuity documentation and management reporting

PREPARE TODAY FOR A MORE RESILIENT TOMORROW

From data protection to full disaster recovery, we design and manage solutions that keep your business secure, compliant and always on.

SAFER TOMORROW

Digital Transformation & Professional Services

Modernize. Automate. Integrate. Grow.

We help organizations accelerate their digital journey with end-to-end professional services, combining deep technical expertise, industry best practices and a customer-first approach.

Cloud Readiness Assessment

Inventory, dependency mapping, risk, security, cost and migration feasibility.

Modern Workplace

Productivity, collaboration, identity, device management and employee experience.

Migration Factory

Repeatable migration planning, execution, validation and handover.

Application Modernization

Re-platform, refactor, integrate and improve application operations.

DevOps & Automation

CI/CD, infrastructure as code, automation and release governance.

Data & Integration

APIs, data movement, integration architecture, analytics and reporting.

Industries We Serve

ENABLING PROGRESS ACROSS EVERY SECTOR

We deliver secure, scalable and innovative cloud, AI and digital solutions that help organizations in diverse industries modernize, optimize and achieve lasting impact.

Government & Public Sector

Secure modernization, productivity, data governance and citizen/employee digital services.

Data Centres

Cloud integration, monitoring, continuity, security and operational technology interfaces.

Healthcare

Secure collaboration, continuity, data protection and AI-enabled productivity.

Hospitality

Modern workplace, cloud operations, cybersecurity and service automation.

Real Estate & Construction

Collaboration, document workflows, mobile workforce, security and analytics.

Manufacturing

Hybrid infrastructure, security, analytics, automation and operational resilience.

Education

Collaboration, identity, device management, security and AI-assisted learning operations.

Retail & Logistics

Cloud applications, productivity, analytics, continuity and customer/service automation.

Professional Services & SMEs

Microsoft 365, security, backup, managed IT, cloud migration and AI productivity.
